PHENOLIC LOCKER

Locker – Phenolic

- Highly attractive design
- Phenolic stands up to extreme moisture and humidity
- Made from decorative laminate with solid black phenolic core
- Impact, water, and corrosion-resistant
- Wide range of sizes, tiers, colors, and options
- 10-year warranty against warping or delamination of material
- Lockers ship assembled; optional top, end panel, and base assembled at the job site

Construction - Standard Feature

Sizes

Standard Sizes:	12", 15", 18"	Wide
	12", 15", 18"	Deep
Nominal	60", 72"	Tall
	1-6, Z Tiers	6T available on 72" ONLY

Doors

Constructed of ½" thick solid phenolic panels. Doors have radiused corners and polished edges. Dirt or graffiti are easily removed with standard industrial cleaners.

Sides, Tops, Bottoms, Dividers, and Shelves

Locker bodies constructed of ¾" thick white solid phenolic panels. Tops, bottoms and intermediate shelves for multi-tier lockers are constructed of ½" thick white solid phenolic panels. Shelves are provided in 60" and 72" one-tier lockers only, located 12" from locker top. Lockers are fixed together with a minimum of six 316 grade stainless steel fasteners through pre-drilled holes. No aluminum or metal profiles or reinforcements are used.

Number Plates

Constructed of black acrylic, locks behind door pull in standard hasp lockers. All other locking mechanisms include a 2" round aluminum disc placed into a cutout section that remains flush with the face of the door. Plates must be fastened to lockers on the job by installer.

Hinge

Heavy-duty, 13-gauge hinge is constructed of type 304 stainless steel. Three hinges are provided for one-tier doors, and two hinges are provided for all other tiers. They are held in place with ¼"-20 stainless machine screws into the prepared door that is drilled, tapped and reinforced with a stainless steel heli-coil. 90 degree stainless steel limit arm is secured under the top shelf to prevent the door from intruding on the adjacent user.

Handle

Constructed of cast satin stainless steel. Handle is secured to door with stainless steel screws.

Hasp

Constructed of 14-gauge stainless steel and attached from inside locker frame using ¼" x 20 button socket head machine screws into stainless steel threaded inserts. In the closed position, the hasp protrudes through the door and into the eye of the cast stainless steel door pull. Padlock is inserted through the eye, locking the door.

Coat Hook

Two-prong swivel ceiling hook constructed of gray nylon. Furnished in 60" and 72" one-tier, two-tier, and Z-lockers only. Hook hangs centered under shelves or locker tops. Secured with stainless steel screws.

Wall Hook

Constructed of gray nylon. (2) hooks standard on one-tier, two-tier, and Z-lockers; one on each side. Mounted at 6" to the bottom of the hook.

- GreenGuard Gold

Construction - Optional Features

Slope Top

Constructed of ½" thick Phenolic panels. Provides a finished look and prevents accumulation of dust and storage of items on top of lockers. Panel is secured using a ledger board on the back wall with aluminum angle brackets secured from the underside of the locker. Available in single locker size or in 24", 30", 36", 45" and 72" lengths. All necessary hardware included.

Flat Top

Constructed of ½" thick Phenolic panels. Provides a finished look on top of lockers. Panel is secured through the locker top from the inside. Available in single locker size or in 24", 30", 36", 45", 54" and 72" lengths. All necessary hardware included.

Base

Pedestal legs constructed of ABS plastic. Adjustable from 4" to 6"H, (4) provided per locker. Includes toe kick.

Wood bases are not recommended.

End Panels

Constructed of ½" thick Phenolic panels. End panels cover white locker sides on exposed ends and are available in flat or slope top styles and in single or double (back-to-back) configurations. All necessary hardware included.

PHENOLIC LOCKER

Locker – Phenolic

Construction - Optional Features

Fillers

Constructed of ½" thick Phenolic panels. Filler is attached through the inside of an end or corner locker with 1¼" x 3" aluminum L-brackets to fill gaps between lockers and a wall or another locker in a corner. Available in colors to match lockers 60" or 72" tall, 4", 8", 12" or 18" wide.

Built-In Key Lock

Standard hasp is replaced with Master Lock key lock #1710. All locks are master keyed and include two user keys for each lock. Key can only be removed from lock in locked position. Master keys ordered separately.

Built-In Combination Lock

Standard hasp is replaced with Master Lock combination lock #1654. All locks are keyed to one master key (included) and come pre-programmed with five separate combinations. Master keys ordered separately.

Digital Keypad Lock

Standard hasp is replaced with Digilock Aspire Standard Keypad lock with door pull. Brushed nickel with motorized bolt function. Available in shared or assigned use. Operated by a 4-7 digit User Code or by an ADA compliant user key.

Vents

Add optional venting with 3/8" slots or 1/4" holes. Pattern varies by tier.

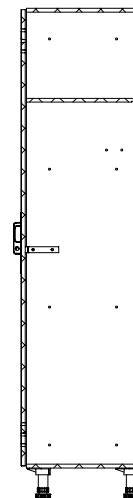

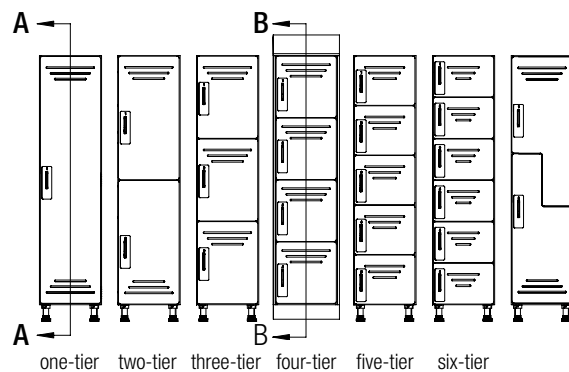

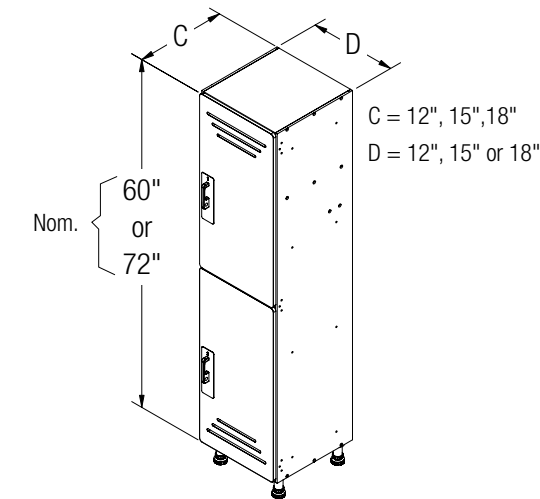

Coat Rod

Constructed of 1¼" polished chrome tube, #890. Rod is mounted with polished chrome flanges, #860PC and stainless steel screws. Available in lockers 18" deep only.

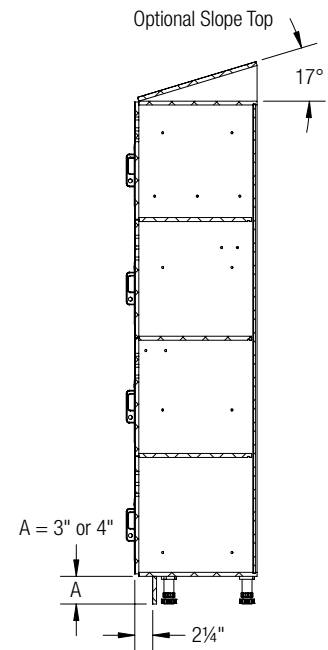

Logos

Handicap logos are available with all lock options. Black sign, 4.5" x 4.5" with double-sided tape.
